### Case Study: Sharing Trip Expenses

---

You and your friends had been on a trip to Jaipur via Mumbai for a college contest and there is a sheet consisting of the expenses and money transactions (refer the spreadsheet titled: trip-expenses.xlsx).

Work out a solution to make the final pay settlements. You will have to tabulate the amount to be shared across each other. You are free to use tools or pen-paper. Team of 2 members.

**Time Limit:** 30 Minutes

**Questions:**

1. Where you able to get the final chart of calculations?
2. If yes, how did you devise it? If not, why not?
3. This is something that we encounter in our daily lives. What is your observation?  
What was your take away?
